# Executive Summary

The analysis of workforce and demographic characteristics, including commuting patterns of Brevard County was conducted to provide economic data on the population and labor force living or working in the county. The report is useful for detailing where workers work and live in order to align resources. This report includes population, labor force, and demographics for Brevard County.

A detailed examination of commuting patterns for Brevard County shows that the county has a net outflow of -20,856 workers. Of the 208,679 people who are employed in Brevard County, 150,689 (72.2%) live and work in the county. There are 57,990 (27.8%) workers who live outside Brevard County and work within the county. Of the 229,535 workers who live within Brevard County, 78,846 (34.4%) residents work outside the county.

Source: U.S. Census Bureau, OnTheMap Application and Longitudinal Employer-Household Dynamics program.

With 34.4% of workers who reside in Brevard County employed outside the county, Brevard County was ranked 60 of 67 for the highest outflow rankings among Florida counties. Miami-Dade County (22.0%) had the lowest outflow rate, followed by Leon County (23.3%) and Duval County (26.4%). Glades County (84.5%), Jefferson County (83.0%), and Union County (81.8%) had the highest worker outflow rates.

## **Labor Shed Analysis**

A labor shed analysis is defined as where workers work and where workers live relative to a user-defined selection area. This analysis helps to determine where a labor market draws its commuting workers. Labor shed studies can draw comparisons between various geographies including state, Congressional District, Metropolitan Statistical Area (MSA), county, Workforce Investment Area (WIA), Zip Code, and Census tract. By indicating how many of the selection area workers work outside the area, labor sheds can help identify potential pools of workers who would be available for work in the user-defined area.

Labor shed studies provide economic developers and existing or prospective employers a tool to understand the local labor market and make informed expansion and site selection decisions. In addition, labor shed studies can help indicate potential impacts from environmental, social, or economic incidents.

Based on 2021 LEHD Origin-Destination Employment Statistics (LODES) data from the U.S. Census Bureau.

## **OnTheMap, Census Bureau**

OnTheMap is a mapping and reporting tool developed by the U.S. Census Bureau showing employment and home locations of workers with companion reports for user-defined areas. It is the first synthetic data product released by the Census Bureau. OnTheMap is an important tool for Florida to perform labor inflow/outflow analyses and provide commuting data to planning and economic development agencies as well as Regional Workforce Boards. OnTheMap data is also used by the Florida Department of Commerce to help quantify natural disaster impacts for emergency management agencies based on where workers live and where they work.

OnTheMap integrates existing data from state-supplied administrative records on workers and employers with existing federal censuses, surveys, and other administrative records. The state Labor Market Information (LMI) agencies supply key data from unemployment wage records and from businesses each quarter. The Census Bureau merges the state-supplied data with current demographic information to produce the data found in OnTheMap. By combining data from different administrative sources, censuses, and surveys, the Census Bureau produces local employment information that was not previously available.

## **Florida Department of Commerce, Bureau of Workforce Statistics and Economic Research (WSER)**

The Florida Department of Commerce, Bureau of Workforce Statistics and Economic Research (WSER), produces, analyzes, and distributes labor statistics to improve economic decision making. These data are produced as part of the federal/state cooperative statistical program with the U.S. Department of Labor, Bureau of Labor Statistics, and the Employment and Training Administration.

## Labor Inflow/Outflow Summary

	Count	Share
<b>Brevard County Labor Market Size (Primary Jobs)</b>		
Employed in the Selection Area	208,679	100.0%
Living in the Selection Area	229,535	110.0%

Building permits, 2022	5,258	211,962	1,665,088

### Legend

The vintage year (e.g., V2016) refers to the final year of the series (2010 thru 2016). Different vintage years of estimates are not comparable.

### Fact Notes

(a) Includes persons reporting only one race

(b) Hispanics may be of any race, so also are included in applicable race categories

(c) Economic Census - Puerto Rico data are not comparable to U.S. Economic Census data

### Value Flags

"-" No or too few sample observations were available to compute an estimate.

"D" Suppressed to avoid disclosure of confidential information

"F" Fewer than 25 firms

"NA" Not available

"S" Suppressed; does not meet publication standards

"Z" Value greater than zero but less than half unit of measure shown
